Möbel sollten generell in klimatisierten Lagerräumen gelagert werden, da sie sonst unter Hitze, Kälte oder hoher Luftfeuchtigkeit leiden können. Durch Temperaturschwankungen können sich Möbel verziehen und dadurch Schaden nehmen.

Wir empfehlen eine Lagerung bei einer konstanten Luftfeuchtigkeit von 50 bis 60 %. Bei abgeschalteten Klimaanlagen kann bei hoher Luftfeuchtigkeit Kondenswasser entstehen, das auf Holzteilen Flecken verursachen und lackierte Oberflächen beschädigen kann.

Bitte bewahren Sie diese Bedienungsanleitung zum späteren Nachschlagen sorgfältig auf! Sie gehört zum Tisch und muss bei der Weitergabe des Tisches mitgegeben werden (wichtige Sicherheitshinweise)

Furniture should generally be stored in a climate-controlled environment, otherwise it may suffer from heat, cold or high humidity. Temperature fluctuations can cause furniture to deform and thus be damaged.

We recommend storage at a constant humidity of 50 to 60%. When air conditioning is switched off high humidity can cause condensation, which can stain wooden parts and damage painted surfaces.

Please keep these operating instructions in a safe place for future reference! It is part of the product and must be handed over when the table is passed on (important safety instructions).

F

Information générales

Les meubles doivent généralement être stockés dans des locaux climatisés, sous peine de souffrir de la chaleur, du froid ou d'une forte humidité. Les fluctuations de température peuvent entraîner la déformation des meubles et donc les endommager.

Nous recommandons un stockage à un taux d'humidité constant de 50 à 60 %. Lorsque la climatisation est éteinte, une humidité élevée peut provoquer de la condensation, qui peut tacher les parties en bois et endommager les surfaces peintes.

Veuillez conserver soigneusement ce manuel d'utilisation pour pouvoir vous y référer ultérieurement! Il fait partie du bureau et doit être remis lors de la transmission du bureau (consignes de sécurité importantes).

I

Note generali

In genere i mobili devono essere conservati in magazzini climatizzati, altrimenti potrebbero soffrire il caldo, il freddo o l'umidità elevata. Gli sbalzi di temperatura possono causare la deformazione dei mobili e quindi il loro danneggiamento.

Si consiglia di conservare i mobili a un'umidità costante compresa tra il 50 e il 60%. Quando l'aria condizionata è spenta, l'elevata umidità può causare condensa, che può macchiare le parti in legno e danneggiare le superfici vernicate.

Conservare queste istruzioni per l'uso in un luogo sicuro per future consultazioni! Appartiene alla scrivania e deve essere consegnato al momento del passaggio di consegne (importanti istruzioni di sicurezza).

Por lo general, los muebles deben guardarse en almacenes con climatización controlada, ya que de lo contrario pueden sufrir el calor, el frío o la alta humedad. Las fluctuaciones de temperatura pueden hacer que los muebles se deformen y se dañen.

Se recomienda almacenar a una humedad constante del 50 al 60%. Cuando el aire acondicionado está apagado, la alta humedad puede causar condensación, que puede manchar las piezas de madera y dañar las superficies pintadas.

Guarde este manual de instrucciones en un lugar seguro para futuras consultas. Pertenece al escritorio y debe entregarse cuando se traspasa el escritorio (importantes instrucciones de seguridad).

Мебель, как правило, следует устанавливать/хранить в кондиционируемых помещениях, иначе она может пострадать от жары, холода или повышенной влажности. Перепады температуры могут привести к деформации мебели и, как следствие, ее повреждению.

Мы рекомендуем хранение при постоянной влажности воздуха от 50 до 60%. Если кондиционеры выключены, то при высокой влажности воздуха может возникнуть конденсат, от которого могут появиться пятна на деревянных поверхностях и повреждения на лакированных частях.

Руководство по эксплуатации является неотъемлемой частью стола. Бережно сохраняйте его для дальнейшего использования! При возможной передаче стола другим владельцам оно должно быть передано вместе со столом, т.к. содержит важные указания по безопасности.

家具通常应存放空调房中，否则会因过热、过冷或受潮而损坏。温度波动会使家具变形并造成损坏。我们建议在50–60%的恒定湿度下储存。当空调关闭时，在高湿度下会形成冷凝，这可能会污染木制部件并损坏涂漆面板。

请妥善保管这些使用说明书，以便将来参考！它是产品的一部分，当桌子转交给别人时请务必一并交出（重要的安全说明）。
