Holzprodukte:
Holz ist ein natürlicher Rohstoff. Jeder Baum ist abhängig vom Standort verschiedensten Einflüssen, wie Klima etc., ausgesetzt. Produits en bois:
Le bois est une matière naturelle. Chaque arbre est exposé à diverses influences, comme le climat etc., en fonction de son lieu de plantation. Cela peut provoquer des fissures.

Prodotti di legno:
il legno è una materia prima naturale. Ogni albero, a seconda del luogo in cui cresce, è esposto a diverse influenze come il clima, ecc. Grazie a questi agenti, l'aspetto (colore, rami, venatura, ecc.) del legno viene fortemente influenzato. A seconda dell'umidità dell'aria e della temperatura, il legno ha la capacità di espandersi e ritirarsi. Questo può portare alla formazione di crepe.

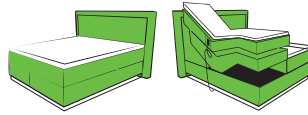

Wooden products:
Wood is a natural raw material. Each tree is subjected to a whole variety of influences, e.g. the climate, depending on its location. These influences are decisive in creating the way the wood ultimately looks (colour, knots, grain, etc.). Depending on the humidity and temperature, wood is capable of expanding and contracting. As a result cracks may form.
