OBS!

Tänk på att det är viktigt att samtliga skruvar på stolen efterspänns regelbundet, beroende på användargrad och inomhusklimat.

Montera stolen på en mjuk och ren yta för att unika märken och repor.

Rotting måste behandlas regelbundet för att förhindra att den torkar ut.

Lös 2-3 msk tvålflingor i 1 liter varmt vatten och rör om.

Spraya blandning på båda sidor av rottingen med en sprayflaska och låt den tränga in i rottingen. Tänk på att skydda övriga ytor.

Attention!

It might be necessary to re-tighten all screws on the chair on a regular basis, depending on the level of use and the room climate.

Assemble the chair on a soft and clean surface to avoid marks and scratches.

Rattan must be treated regularly to prevent it from drying out.

Dissolve 2-3 tablespoons of soap flakes in 1 liter of warm water and stir.

Spray mixture on both sides of the rattan with a spray bottle and let it penetrate the rattan. Remember to protect adjacent surfaces.
