

General Product Safety warnings (GPSR)

General Product Safety warnings associated with all Stelton A/S and all subsidiaries' products, in order to comply with 2017/745/EU – General Product Safety Regulation (GPSR). Below is a list of Stelton product categories available on the market and their associated warnings, as safety information for all our consumers.

To-Go Items for Hot and Cold Liquids

1. General Use

- Do not overfill to avoid spillage and burns.
- Ensure the lid is securely closed before use.
- Keep out of reach of children when containing hot liquids.

2. Hot Liquids

- Contents may be extremely hot. Use caution when drinking.
- Always test the temperature before drinking to avoid burns.

3. Cold Liquids

- Avoid freezing if the product is not marked as freezer-safe to prevent damage.
- Condensation may occur; handle with care to avoid slipping.

Glass Items for Hot and Cold Liquids

1. General Use

- Handle with care; glass is fragile and may break if dropped.
- Inspect for cracks or chips before use. Do not use if damaged.

2. Hot Liquids

- Allow hot liquids to cool slightly before pouring to avoid thermal shock.
- Use a protective sleeve or holder if included.

3. Cold Liquids

- Do not expose to sudden temperature changes (e.g., pouring hot water into a cold glass).

Cups for Hot and Cold Liquids

1. Hot Liquids

- Handle with care as surfaces may become hot.
- Use a coaster or avoid placing on sensitive surfaces to prevent heat damage.

2. Cold Liquids

- Do not overfill to prevent spillage.
- Ensure the base is stable to avoid tipping.

Ovenproof Dishes

1. Usage

- Use only in ovens within the specified temperature range (e.g., max. 250°C).
- Do not use on stovetops, open flames, or under a grill unless specified.

2. Handling

- Always use oven mitts or heat-resistant gloves to handle hot dishes.
- Avoid placing directly on cold or wet surfaces to prevent thermal shock.

3. Cleaning

- Allow the dish to cool completely before cleaning to prevent cracking.
- Avoid using abrasive cleaning tools to maintain the surface integrity.

Thermo Jugs

1. General Use

- Do not overfill to avoid spillage and potential burns.
- Ensure the lid is securely fastened to maintain temperature and prevent leaks.

2. Hot Liquids

- Contents may be extremely hot. Use caution when pouring.
- Do not touch the outer surface if it becomes hot during use.

3. Cold Liquids

- Avoid freezing if the product is not freezer-safe.

Hurricane Oil Lamps

1. General Use

- Use only recommended lamp oil. Never use gasoline or alcohol.
- Keep out of reach of children and pets.

2. Operation

- Do not move the lamp while it is lit or still hot.
- Avoid overfilling to prevent oil spillage.

3. Safety

- Use in a well-ventilated area. Never leave unattended while lit.
- Ensure the flame is fully extinguished after use.

Serving Jugs for Hot and Cold Liquids

1. Hot Liquids

- Do not touch the outer surface if it becomes hot.
- Always pour carefully to avoid splashing and burns.

2. Cold Liquids

- Condensation may occur; use with care on sensitive surfaces.

3. General Use

- Do not use in the microwave unless marked as microwave-safe.

French Press Coffee Makers

1. Operation

- Ensure the lid and plunger are properly secured before pressing.
- Do not use excessive force when pressing to avoid spillage or breakage.

2. Hot Liquids

- Contents are extremely hot; handle with care to avoid burns.
- Always test the temperature before drinking.

3. Cleaning

- Allow to cool completely before disassembly and cleaning.
- Do not use abrasive cleaners or tools to prevent damage.

PET Drinking Bottles

1. General Use

- Designed for cold liquids only; do not fill with hot liquids.
- Avoid freezing if not specified as freezer-safe.
- Avoid the use of dishwasher for cleaning; this will cause the bottle to deform.

2. Safety

- Inspect regularly for cracks or wear; replace if damaged.
- Do not expose to direct sunlight for extended periods.
